

# LIGHTWORK

The new series Mirror/Mirror created by Hüseyin Turgut for Lightwork is all made in "crafts nickel", a special handicraft manufacturing method used in the Lightwork atelier in Istanbul, using pure high quality brass as base material with a fine top layer of nickel, to create the perfect surface needed for an elegant mirror-like reflection.

All models in the Lightwork collection is available in the new Mirror/Mirror series from October 2015.
